

TASK 7: LEGAL GROUNDS IN YOUR PROJECT

DISTRIBUTION 16.06.2025, PRESENTATION ON 23.06.2025

Select the same project as in exercise 3 or exercise 5 / 6. Elaborate for your project that provides (OOP-enabled) public services to citizens or businesses as follows:

Investigate what regulations form the legal foundations for the project, in particular with regards to the service provisioning.

- a) Name each regulation that you identify as impactful to your project, incl. URL, and explain what particularly the regulation frames with respect to your project and specifically the service provisioning.
- b) Explain in more detail what exactly the technical implications are, i.e. what particular technical features need to be implemented based on the regulations
- c) Reflect on particular challenges and constraints the regulations put on the use of (disruptive) technologies for innovative public service provisioning.

Upload your presentation until Sunday 22nd June and present the results in the exercise class on 23rd June – each group has max 8 minutes for the presentation. Max 5 groups will be able to present.

Ensure to put the URLs to the project and concepts you are using on the slides.

Only people presenting receive the tick mark for presentation.
