

TASK 5: ANALYSING PROJECTS REGARDING ONCE-ONLY PRINCIPLE

DISTRIBUTION 26.05.2025, PRESENTATION ON 02.06.2025

Select one project of your team from the exercise 1, which is suitable for a once-only principle context. Your task is to examine this project with regard to implementing the once-only principle. The project must involve more than one stakeholder beyond the customer (citizen or business):

If your project implements the once-only principle, then elaborate:

1. How does it implement the once-only principle?
2. What are the enablers employed in the project to realize the OOP?
3. How could the project be expanded to improve the OOP implementation – draw your own scenario

If project does not implement the once-only principle, then elaborate:

1. How would the project need to be expanded to realize the OOP?
2. What enablers are needed to realize the OOP?
3. Draw your own scenario for an ideal OOP scenario of the relevant public service

Upload your presentation until Sunday 01st June and present the results in the exercise class on 02nd June – each group has max 8 minutes for the presentation. Max 5 groups will be able to present.

Ensure to put the URLs to the project and concepts you are using on the slides.

Only people presenting receive the tick mark for presentation.
