TASK 1: IDENTIFICATION OF E-GOVERNMENT PROJECTS AND KEY ACTORS (6 POINTS)

DISTRIBUTION 28.04.2025, PRESENTATION ON 05.05.2025

Search via the WWW and identify practical projects of e-government / public service provisioning. In the group, you should select projects along the following

- One project at central / federal Government level
- One project at municipal level
- One project involving cross-border public service provisioning

The projects should address three different relationships as presented in the lecture. Driving questions are:

- What are the projects about?
- What public service is provided online and to whom?
- Who are the relevant actors?
- What digital technologies are involved?

Present the projects in the exercise class on 05th May – each group has max 8 minutes for all projects. Max 5 groups will be able to present.

Ensure to put the URLs to the projects on the slides.

Only people presenting receive points.
